Mohamed Amr Yehia

M.amryehia@gmail.com - +201099099162 - LinkedIn

Education

Bachelor of Engineering, Ain Shams University, 2021
- Department : Electrical Power & Machines.

Experience

ML Engineer, DetectNow, remote (Mar. 2020 - Now)
I worked on signal processing and cough data preparation. I am also responsible for architecting the ML pipeline.

Junior ML Engineer, Omdena, remote (Jan. 2020 - Mar. 2020)
One of 45 collaborators from 27 countries, currently working on the Creedix Challenge for banking credit-score design.

ML Intern, iNetworks, Cairo (Jul. 2019 – Oct. 2019)
worked on ML pipeline starting from data collection to model deployment passing through problem definition, summarizing, analyzing, transforming and visualizing data.

Trainee, Huawei ICT Academy, Cairo (Sept. 2019)
won a bronze medal at Huawei ICT challenge. Training Scope was HCIA-Storage V3.0 Course and HCIA-Storage V3.0 Lab Guide.

Trainee, IBM, Cairo (Jul. – Aug. 2018)
Attended a two weeks training about Artificial intelligence and Business Process Development.

Projects

[1] Credit Scoring: Banking the unbanked!: (Banking the unbanked) to leveraging the potential of machine learning for credit scoring to provide millions of people with funding opportunities.

[2] Employees Skill Gap: a machine learning and AI algorithms to make sure that you'll identify the gap between your skills and market needs.

[3] Real-time face detection: this was aiming to study customers habits by recording the time when customers come to the store and register non-customer encodings in the database.

[4] Interactive chat-bot: It was build based on voice user interface principles. Through Virtual Reality, Natural Language Understanding, Speech to Text and Text to Speech techniques, I created 3D interactive artificial human with Amazon Sumerian, Lex and Polly.

Extra Curricular Activities

I participated in more than 30 Hackathons with Riseup, Vodafone, DAN, Health 2.0 ,and robusta. Moreover, my team was #CodeVsCovid19 winner.
- Devpost
- Badgewell

I am interested in Entrepreneurship. I attended **ASU Innovates** and **NilePreneurs** Cycle 2.

Courses

- I enrolled in most of SuperDataScience courses for Databases, Machine Learning, Deep Learning and Artificial Intelligence.
- PyTorch Scholarship Challenge., Udacity
- Secure & Privacy AI Scholarship Challenge., Udacity
- Intel Edge AI Scholarships., Udacity
- Bertelsmann Technology Scholarship Program., Udacity

Skills

Programming Language : Python
Machine Learning Frameworks: PyData ecosystem, Keras and Pytorch, OpenCV
Databases : SQL(PostgreSQL), NoSQL(MongoDB)
Web Scraping : BeautifulSoup, Selenium
Software Engineering: Git**,** Docker, Flask
